EDUCATION

German University in Cairo

Bachelor of Engineering in Computer engineering

Cairo, Egypt

May 2021 – Present

German International University in Berlin

Bachelor of Engineering in Computer engineering, Student Exchange program

Berlin, Germany

March 2024 – June 2025

EXPERIENCE

Software Engineer

Forsa Prop

October 2025 – Present

Cairo, Egypt

- Data scraping and processing solutions using Python
- Both frontend and backend web development using JavaScript and Node.js
- Deployment and maintenance of web applications on cloud services using cloudflare and railway

Unity Game Development Internship

Phantasm Solutions

July 2025 – October 2025

Cairo, Egypt

- Both theoretical game design of systems and hands on C# development
- worked on creating game environment and backbone systems as well as NPC AI and interactions

IT Internship

British University in Egypt

May 2025 – June 2025

Cairo, Egypt

- worked with all IT departments including networking, development and cloud services

Software Development Internship

Schneider Electric

July 2023 – August 2023

Cairo, Egypt

- Back-end developed and deployed an on-boarding web application for new employees
- Created multiple test cases for Manual Functionality testing and a reporting structure

Organizational Wing Director

Vector Game Studio - Extra Curricular Student Activity

2021 – 2024

Cairo, Egypt

- Scouted, Enlisted, Trained and managed multiple different teams of talented people to produce a productive work environment

PROJECTS

Feed Forward Neural Netowrk [CSEN1121] | *Python*

2025

- implemented a feed forward neural network from scratch

Implementing ONNs in Texture Generation ML models [Bachelor] | *PyTorch*

2025

- Investigated multiple complex texture generating ML models
- Integrated Operational Neural Networks into the architecture of one of the model

Pathfinder [CSEN704] | *PyTorch*

2024

- MERN Stack project to create a travel panning and booking web application
- Used 3rd party APIs to fetch hotel and flight data and bookings as well as simulate payments

Dockerized Webcrawler [Personal] | *Scrapy,PostgreSQL,Docker*

2024

- Web crawler using scrapy on an event booking site, data Pipelined into a Postgres DB
- WebCrawler and DB were hosted on seperate containers and run using Docker Composite

University Advising System [DB502] | *SQL, React*

2024

- Developed and implemented a full relational database Schema manually
- Designed Front-end UI using Figma and implemented using react

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, C#, ProLog, Haskell

Frameworks: Scrapy, Node.js, JUnit, .NET core

Developer Tools: Docker, Git, VS Code, Visual Studio, Eclipse, Spyder, Slack, Trello, MongoDB
